

MyPal Schools Announces the Addition of a School Safety Chat Feature for the Program

MyPal Schools new instant chat feature helps take school safety to a whole new level as we continue our journey to keep children safe at school.

CHICAGO, June 16, 2022 MyPal Schools has deployed a new global release of its Instant Chat app that focuses on helping students remain safe when it comes to Bullying, Cyberbullying, Personal Crisis, Fighting & School Threats. With the web-based school program already keeping children safe, the new instant chat feature only strengthens the equity in making sure children feel safe.

“Having the ability to quickly and easily connect with school staff & administrators who can instantly help students has to be the #1 priority for the 2022-23 school year,” said Shagmond Lowery, Developer. “The new addition of instant chat features to MyPal Schools not only helps students identify and engage school situations with school staff, but it also simplifies the communication sharing process when it comes to offering school safety.”

New instant chat features include:

- **Instant Situation Reporting**, which enables students to report situations of Bullying, Cyberbullying, Personal Crisis, Fighting & School Threats instantly to school staff & administrators
- **Enhanced mobile support** of student reports, using responsive design and optimizing the student experience on any device
- **Helpdesk tickets**, powers up the asynchronous portion for your school staff, and instant chat enables you to handle it whenever and wherever you want
- **Drag & Drop options** make communication easy, accessible, and intuitive. Drag and drop shortens the attachment process, making the safety chat experience all the more accurate for school staff to document

“With school bullying and school crisis happening everywhere at the center of today’s news across the country, this instant chat enhancement furthers our commitment to keeping children and school staff safe at schools, at all times,” said Lowery.

The new updated chat also features a student friendly design for the MyPal Schools platform, giving more students options to feel safer within the school environment. School safety has to have a new fresh look and feel in these changing times.
