My PAL SCHOOLS

Introduction

MyPal Schools is proud to provide a web-based software for elementary, middle and high school schools that allow students to report Bullying, Cyberbullying, Fighting & School Threats on and off campus.

Students, parents, and community members can report incidents for unsafe situations including bullying, cyberbullying, fighting, and/or school threats. The information can be reported and passed on to school personnel by using MyPal Schools software.

Every 7 seconds a teen is bullied by another teen

Web-Based Software Design

MyPal Schools are "Personal Alert Levels" that provides students a quick and safe way to communicate school incidents. This software does not replace face-to-face communication or other methods for reporting, however it does act as an instant and accessible form of communication that can be sent to several staff members at one time.

MyPal Schools offers the unique feature of being available to families and community members 24 hours a day, 7 days a week. The system also offers the option of anonymity, which offers students another layer of support and a chance to communicate in a manner that may make them feel more comfortable and safe.

Each day, 160,000 students miss school for fear of being bullied

This software is not for immediate response. If anyone needs immediate assistance, they should dial 911.

How does it work?

Students or Parents

- Go to the School's Homepage
- Click on the MyPal Schools Logo
- Click on the Alert Needed (Bullying, Cyberbullying, Fighting, School Threat)
- Fill-in the checkboxes and explain
- Click Submit

Schools (With the purchase of MyPal Schools Software, schools have the options for our development to customize different areas)
